2026 FCS Outlook: Advancing Smart Manufacturing, Creating Sustainable Value Together

In 2025, FCS advanced its market-driven strategy by strengthening core technologies, smart manufacturing, and global deployment, delivering measurable results. The release of its ESG report further reinforced transparency across environmental, social, and governance practices. **With strong SA Series sales, CT all-electric systems entering Europe, and expanding iMF 4.0 adoption**, FCS moves into 2026 with a clear focus on smart, low-carbon manufacturing worldwide...
